Overview

Crossref Similarity Check

Siklus yang Menentukan!

Crossref Similarity Check

A service provided by Crossref and powered by iThenticate—Similarity Check provides editors with a user-friendly tool to help detect plagiarism.

Database Contents

STM Publishers: 50 Million	Content Partners: 110 Million	Internet: 60 Billion
<p>Journal articles, conference proceedings and books via Crossref Similarity Check powered by iThenticate from 800+ leading scientific, technical and medical (STM) publishers, including:</p> <p>American Chemical Society, American Institute of Physics, American Physical Society, Elsevier IEEE, Institute of Physics, Lippincott Williams & Wilkins, Nature Publishing, Ovid, Oxford, University Press, Sage Publications, Springer, Taylor & Francis, Wiley Blackwell</p>	<p>Online and offline subscription content and research titles from 30 leading aggregators, databases and content providers, including:</p> <p>ABC CLIO, Cengage Learning, EBSCOHost: 2.7m periodicals, biographies, brochures, encyclopaedias, magazines, journals, books, and abstracts, Emerald Journals, Gale: 86m articles, Pearson, McGraw-Hill and Wiley: 2,000+ academic textbooks, ProQuest: 300,000+ theses and dissertations, PubMed/MedLine: 1.4m abstracts and citations; medical resources, SAGE Reference: 160+ encyclopedia titles</p>	<p>iThenticate's proprietary Internet crawler is comparable to major search engines. Archived back nearly a decade, iThenticate currently crawls 10 million web pages per day.</p>

Cutomize Database & Languages

Customize Database	Language
iThenticate customers with organizational subscriptions can utilize a private, custom database for document-to-document comparison for checking of future papers against previously published work.	iThenticate searches for content matches in the following 30 languages: Chinese (simplified and traditional), Japanese, Thai, Korean, Catalan, Croatian, Czech, Danish, Dutch, Finnish, French, German, Hungarian, Italian, Norwegian (Bokmal, Nynorsk), Polish, Portuguese, Romanian, Serbian, Slovak, Slovenian, Spanish, Swedish, Arabic, Greek, Hebrew, Farsi, Russian, and Turkish. iThenticate will match text between text of the same language.

Benefits

1. Peace of mind for publishers and authors that their content is identified and protected,
2. A way for editors to educate their authors and ensure the reputation of their publication,
3. Clarity for readers around who produced the work.
4. Enjoy the cost-effective.
5. Turnitin Engine via iThenticate

Source: <https://www.crossref.org/pdfs/about-similarity-check.pdf>

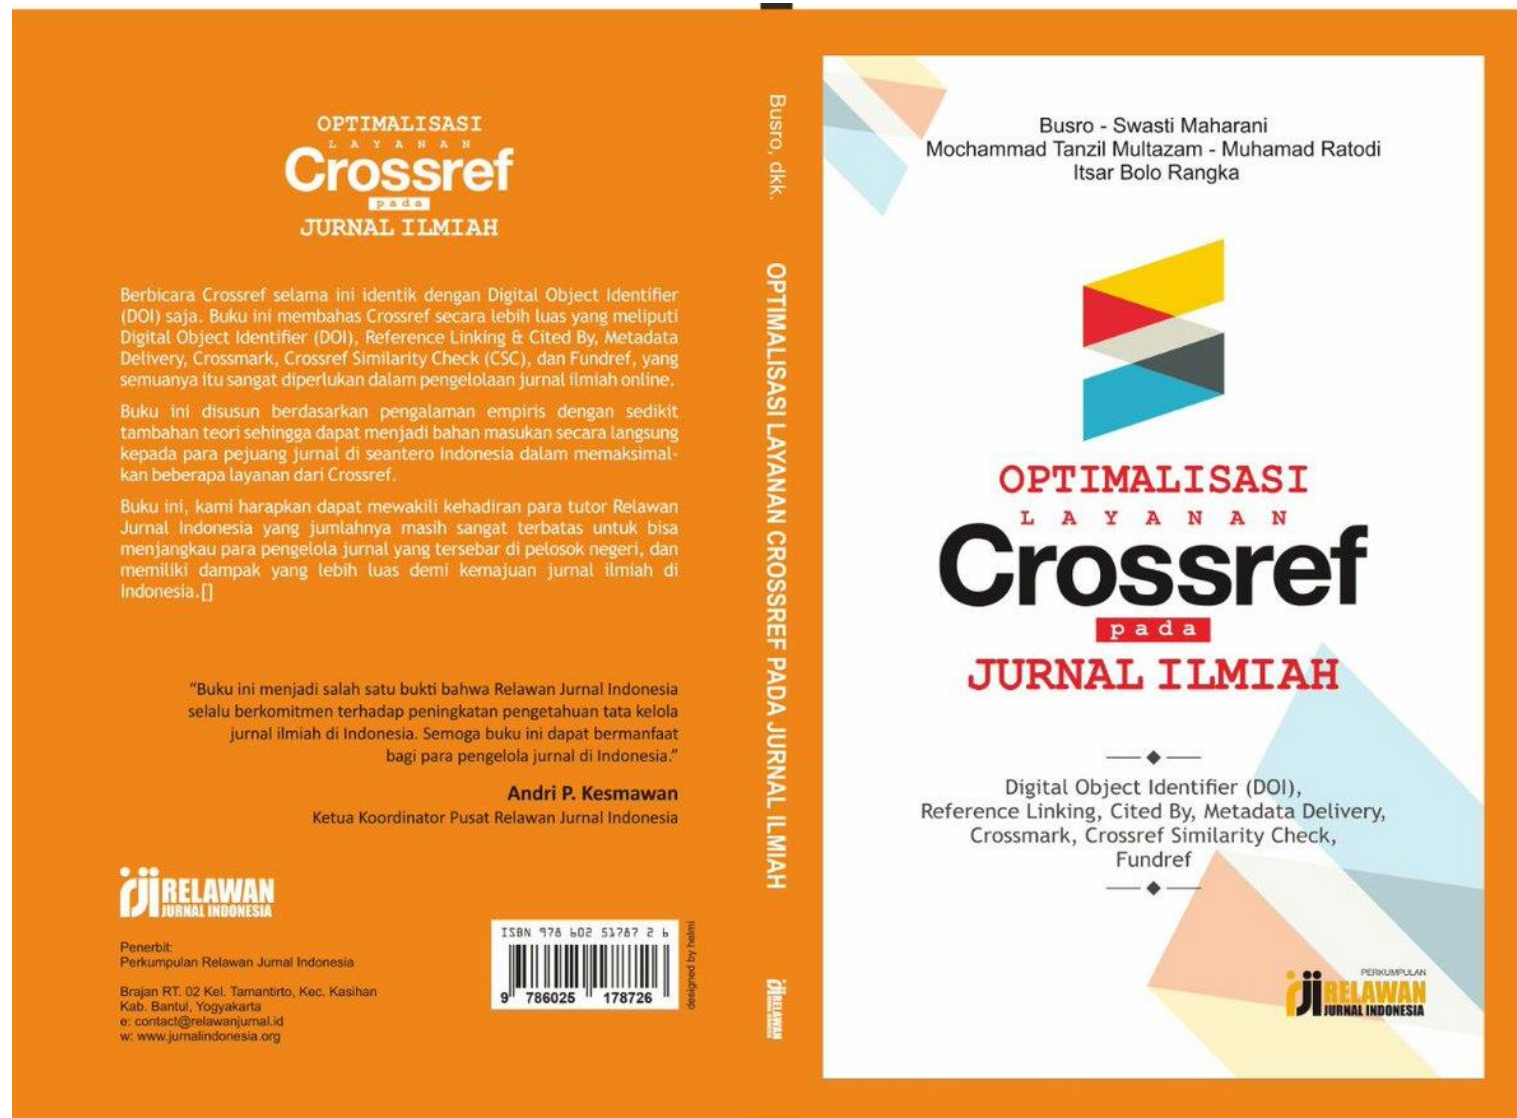

Pembiayaan (Skema RJI)

1. System Deposit dengan minimal IDR 1.000.0000
2. Rincian Invoice/Tagihan Crossref Similarity Check per content dan Invoice/Tagihan DOI Crossref dijadikan satu.
3. Free 100 documents check pertama tiap tahun
4. Free biaya Tahunan
5. Pemindaian dikhususkan untuk journal article

Number of documents checked per year	Price per document up to max 50 pages per document
1 - 100	\$0.00
101 - 5,000	\$0.75
5,001 - 25,000	\$0.65
25,001 - 50,000	\$0.55
50,001 - 100,000	\$0.45
100,001 - 200,000	\$0.30
>200,001	\$0.25

Lebih Detail

How to Register/Participating

Beberapa Ketentuan

1. Member of Crossref
2. Aktivasi DOI minimal 90% untuk konten jurnal (termasuk fulltext URLnya);
3. URL harus tertarget langsung pada full-text PDF, HTML, atau Plain text content;
4. Deposit Metadata / PDF artikel pada Crossref sebaiknya dapat diakses oleh siapa saja, dan;
5. Jika telah menjadi member Crossref melalui RJI (Sponsoring Organization of Crossref di Indonesia), silahkan isi formulir berikut:
<https://forms.gle/MDitwqdntDAFk4PX8>

Checking your eligibility!

Member Name	<input type="text" value="konselor"/>
<div>Ikatan Konselor Indonesia (IKI) (ID:12086)</div>	
Member ID	<input type="text"/>

Member Name	<input type="text" value="konselor"/>
Member ID	<input type="text" value="12086"/>

Running for (ID:12086)

Member Name	<input type="text" value="konselor"/>
Member ID	<input type="text" value="12086"/>

Results for (ID:12086)

100/132 = 75.76%

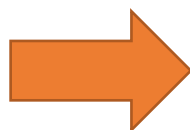

[Generate CSV](#)

1. Ketikkan nama publisher (sesuai yang didaftarkan di Crossref) pada kolom **Member Name**
2. Catat nomor ID yang tertera, dan input nomor ID tersebut ke kolom **Member ID**
3. Crossref melakukan **pengecekan full-text URLs** yang telah di DOI kan
4. Hasil **75,76%**. Agar memenuhi syarat, kita harus mendaftarkan url teks lengkap (PDF) minimal 90%. Silahkan download CSV dengan cara klik Generate CSV.

1. Perhatikan struktur DOI pada file .CSV dimana NULL berarti DOI sudah dideposit namun PDF artikel belum tersedia.
2. Copy DOI, dan paste di kolom doi pada <https://www.doi.org/>
3. Setelah laman artikel terbuka, lakukan cek posisi atau lokasi PDF. Copy URL PDF nya dan ganti tulisan NULL dengan URL PDF artikel
4. Jika sudah terisi semua, silahkan simpan (masih dengan format .csv) dan lakukan proses Upload ke Web deposit Crossref (<http://www.crossref.org/webDeposit>) atau berkirin email ke support@crossref.org untuk update

Lakukan Perbaikan (2)

These forms allow you to enter metadata and register DOIs. Review the [help documentation](#) for details.

Note: Your Crossref username and password will be required at the end of this process to submit data to the system. **Please insure your browser allows JavaScript so that the data validation will function.**

Step 1: Select Data Type

Add and Remove URL Report Filters

Use this form to manage the list of URL Report Filters for your account. These URLs will be filtered out of the matching content search for every user's submissions when generating the Similarity Report. Users may add additional URL Report Filters in the settings options for each folder.

There are currently no URL Filters. Use the form below to add a URL.

Add URL Filter. The URL may be as specific or general as you wish.
For example:

`http://example.com/` - exclude entire site (note trailing "/")
`http://example.com/docs/` - exclude all sources from a specific directory
`http://example.com/docs/paper.pdf` - exclude specific document

[Add URL](#) [Cancel](#)

Opsi bagi user Ithenticate untuk memilah URL yang tidak diikutsertakan dalam proses screening article. Salin URL yang dimaksudkan dan klik ADD URL.

SARAN: URL yang dituju sebaiknya spesifik pada page tertentu.

Before we
Begin (Praktik)

What percentages are safe?

According to the Turnitin article on Interpreting Turnitin Originality Reports “**There are no clear cut rules for this as all work will probably contain some words from other sources**”. As a guide a returned percentage of **below 15%** would probably indicate that plagiarism has not occurred. However, if the matching text is one continuous block this could still be considered plagiarism. **A high percentage would probably be anything over 25%** (Yellow, orange or red). Again this will depend on the students work and the requirements of the report or essay”.

More Info:

<https://eatsupport.tees.ac.uk/student/knowledgebase/how-to-interpret-turnitin-originality-reports/>

Best Practices (1)

1. Setting dulu filter (exclude Reference, exclude quotes, dan jumlah kata yang sama)
2. Setelah results similarity keluar, perhatikan 5 (lima) hal:
 - a) Prosentase masing-masing URL;
 - b) Fulltext URL dengan kemiripan terbanyak;
 - c) Lokasi kemiripan di artikel yang di scan (di referensi/kutipan/judul/isi dst);
 - d) Lokasi kemiripan di fulltext URL pada laporan (di referensi/kutipan/judul/isi dst);
 - e) Kategori tulisan pada fulltext URL pada laporan (pre-print/copy artikel/artikel yang terbit sesudahnya).

Best Practices (2)

3. Exclude semua url yang merupakan:

- a. Lokasi artikel tersebut sendiri atau copy artikel atau artikel yang terbit sesudahnya (jika pengecekan setelah artikel terbit).
- b. Kesamaan terletak di Referensi atau Kutipan langsung yang sudah sesuai kaidah pengutipan.
- c. Kesamaan terletak pada suatu kalimat yang jamak dipakai (penyebutan lengkap Peraturan, kalimat baku, dst)
- d. Lokasi pada penyimpanan preprint (biasanya masih berupa laporan penelitian atau draft awal artikel).

4. Print hasil similarity check jika Step 1,2,dan 3 telah dilakukan

Pre-Print

What is a preprint?

Preprints are publication-ready research papers that are made public before peer review and formal publication. Preprints are designed to address the speed of scientific communication, the accessibility of knowledge and the existing tendency to report mostly positive results. Preprints have a [long history](#) in research dissemination and are part of the story about how the web was created. They have long been used in physics and math with nearly 10,000 preprints posted per month at arXiv and are starting to gain rapid adoption in other disciplines like the life sciences. In fact, the growth of preprints in other disciplines was named one of *Science's* [events that shaped 2016](#).

<https://www.authorea.com/users/8850/articles/155312-introducing-the-21st-century-preprint-html-versioned-citable-data-rich>

Singkatnya, Preprint adalah dokumen ilmiah yang dipublikasikan sebelum dikirimkan ke suatu media jurnal/conferences untuk menjalani peer-review. Tapi makalah ini memiliki identitas semua makalah ilmiah, termasuk DOI. Jadi sudah bisa dirujuk bilamana memang relevan dengan paper/project anda.

<https://medium.com/open-science-indonesia/preprint-bukan-duplikasi-apalagi-plagiarisme-587c4c5ba935>

Memahami Pre-Print

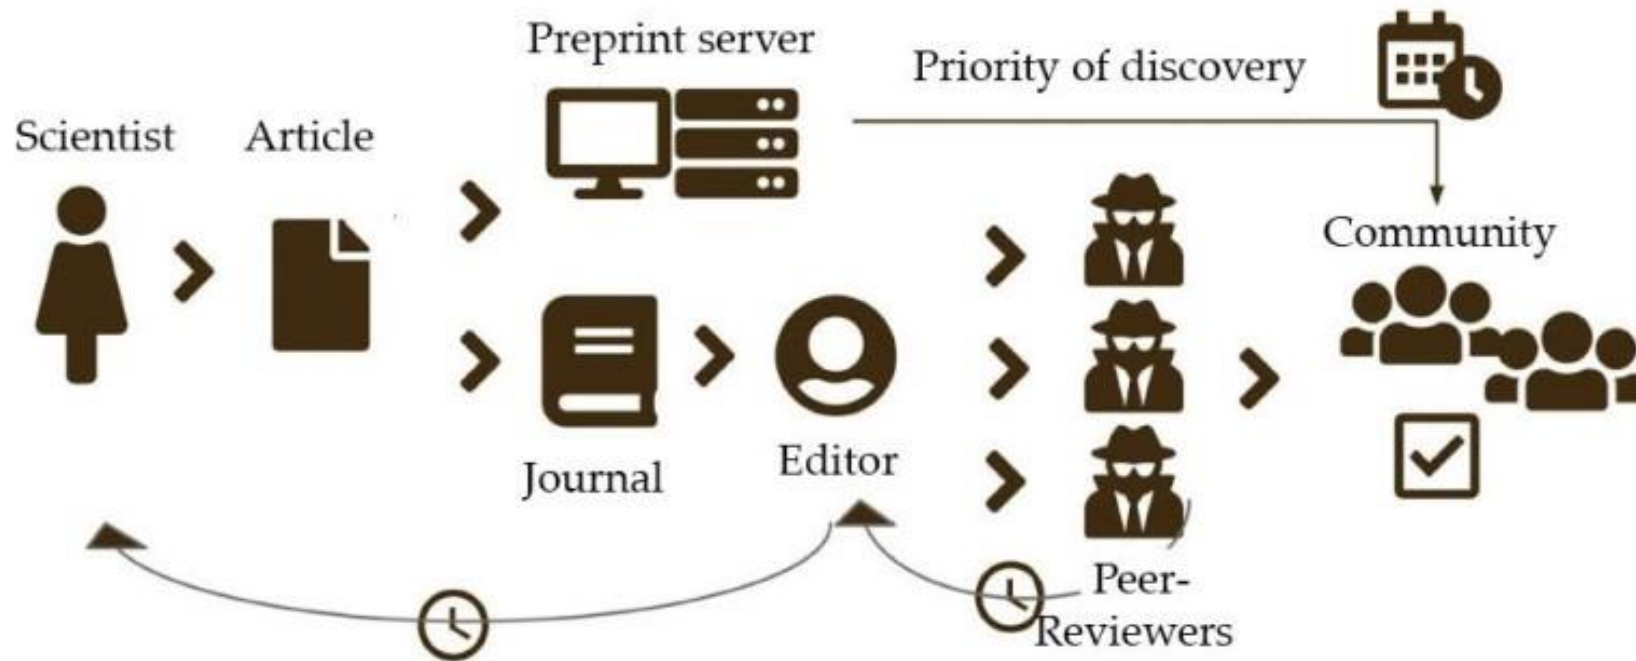

Figure 2. Preprint submission workflow establishing priority of discovery (modified after Tennant et al. [2]).
